

Glocal Climate Change Investigation

Directions: Use the charts below to guide your research on impacts of climate change glocally (globally and locally). There are multiple components of the assignments, each chart will guide your work. You will investigate, engage, take action and reflect.

1. Investigate

Understanding Climate Change in Your Local Community

What is climate change?	How is climate change impacting your local community? Give specific examples.	Are there any actions being taken by government sources or others to mitigate the impacts of climate change in your region? If so, explain.	Hyperlink all sources used.

2. Engage

Interview Your Global Partners [Video Exchange]

In your groups create four interview questions and record the responses

Question 1:	Question 2:	Question 3:	Question 4:
Response 1:	Response 2:	Response 3:	Response 4:

3. Take Action

Think About Your Impact
What can I do to contribute...

In my inner circle (of friends, family, the people I know)?	In my community (my school, my neighborhood)?	In the world (beyond my immediate environment)?

4. Reflect

Individual Reflection

In a few sentences below, write about your experience learning about climate change and your interactions with your global peers. What are some of the new things you've learned? Were you surprised to learn anything? Explain.
